

TECHNICAL SPECIFICATIONS « ON THE SIDE OF LIFE »

Contact

+33 (0)6 76 21 82 42 phgoudard@wanadoo.fr

Accessibility

Show in French,
duration 1 hour and 25 minutes
Recommended for ages 12 and up

Team

Two people on tour
Arrival: the day before
Standard arrangements for hotel, transportation, living expenses, etc...

Stage Space

Given artistic choices offering very light scenography,
the show has been performed in a wide variety of spaces:
minimalist theaters, university amphitheaters, circus tents, theaters,
Not suitable for outdoor performances

When performed in an equipped theater:

Frontal setup

If the stage is at the same level as the audience, it must be fully visible to spectators.

Bare stage

Flat, horizontal, rigid floor

Minimum dimensions: opening 5m, depth 4.5m, height under grid 3.50m

Lighting

A layout plan can be provided for equipped venues
(provide us with the venue's technical specifications)

For information, at minimum:

one front plan, one backlight plan, two floor sources on plates,

For other types of venues: please consult us.

Sound

If the theater is equipped: appropriate sound system and diffusion for the venue
and a mini-jack connection to the stage.

Technical rehearsals and operations

A technician from the hosting venue upon the arrival of the artistic team until departure

Duration: 2 hours for unloading, installation, setup, adjustments

4 hours for rehearsals in a space free from other activities

30 minutes: dismantling, reloading

Equipment Packaging

Three suitcases of accessories and costumes (maximum 23 kg each)

6 CP wooden cubes (40/40/40 cm overall) 30 kg provided

but can be built on site.

One bar stool, one "servant", one coat rack.

A roller tray (50/80/15 cm)

Dressing Room

An air-conditioned dressing room equipped (shower, toilet, resting area...). Catering.
